EVERPURE EF-3000 FULL FLOW DRINKING WATER SYSTEM

GENERAL INSTALLATION / OPERATION / MAINTENANCE REQUIREMENTS

This drinking water system must be maintained according to the manufacturer's instructions, including replacement of filter cartridges. The substances reduced or removed by this system are not necessarily in your water. Read the performance data sheet for more information.

It is recommended that before purchasing a water treatment unit, you have your water tested to determine your actual treatment needs

Space required: 13W x 50.8H x 13D cm (5W x 20H x 5D in) including 2-1/2 inches of clear space under unit for cartridge change

Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. Systems certified for substance reduction may be used on disinfected water that may contain filterable cysts.

Install vertically with cartridge hanging down

Flush new cartridge at full flow for three minutes to purge air

Replace cartridge when capacity is reached, or when flow becomes too slow, but at least annually

EASY INSTALLATION STEPS

Shut cold water supply off and disconnect cold water hose.

Connect cold water supply hose from faucet to outlet of filter head.

Mount filter head and connect water supply to inlet of filter head.

Install Quick Change cartridge and turn on water.
